

SUPERIOR SULFUR RELEASE

SO₄TM
PELLETIZED GYPSUM

SO₄ is the superior sulfur source that delivers the right amount of sulfur perfectly matching plant needs for yield-maximizing plant growth.

SUPERIOR SULFUR RELEASE

SO₄ supplies a strong initial release of sulfur followed by a steady supply throughout the growing season perfectly matching plant needs. Ammonium sulfate (AMS) is 300x more soluble than SO₄, releasing sulfur too quickly, and elemental sulfur releases sulfur too slowly, neither meeting the crop's complete needs.

PH NEUTRAL

SO₄ is pH neutral, which means it will not acidify the soil like other sulfur sources. Proper soil pH maximizes a plant's utilization of nutrients promoting good plant health and optimizing yield.

APPLICATION FLEXIBILITY

SO₄'s consistent pellet size allows it to be blended and applied with other dry fertilizers and makes it the smart choice for any application scenario.
